Media Invited to Attend The Sky Factory Groundbreaking Tuesday, September 11, 11:30

FAIRFIELD, (Iowa) – The Sky Factory LC, a Fairfield, Iowa company, will break ground on the site for its new facility on Tuesday, September 11, 2007 at 11:30 am. The 5-acre groundbreaking site is directly east of the former Meritor building in Fairfield across 18th Street and approximately 700 feet south of Gear Avenue. The site was sold to The Sky Factory by the Fairfield Economic Development Association [FEDA]. FEDA facilitated the rezoning of the parcel from agricultural zoning to light manufacturing.

The Sky Factory manufactures custom ceiling systems which replicate natural outdoor surroundings. The company ships internationally and has enjoyed substantial success since its launch; it is now poised to build an 11,000 square foot facility which is highly energy efficient and environmentally responsible.

The groundbreaking will be accompanied by a formal media release by Bill Witherspoon, The Sky Factory President.
